Statement of Ownership, Management and Circulation
(Required by 39 U.S.C. 3685)

1. Title of publication: Journal of Research in Science Teaching
2. Date of filing: 1 October 1981
3. Frequency of publication: Bimonthly
   A. Number of issues published annually: six
   B. Annual subscription price: $45.00
4. Complete mailing address of known office of publication: John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158
5. Complete mailing address of the headquarters or general business offices of the publishers: John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158
6. Publisher: John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158
   Editor: James A. Shymansky, University of Iowa, Iowa City, IA 52242
   Managing Editor: None
7. Owner: National Association for Research in Science Teaching, Drake University, Des Moines, IA 50311
8. Known bondholders, mortgagees, and other security holders owning or holding one percent or more of the total amount of bonds, mortgages, or other securities: None
10. Extent and nature of circulation

	Average number of copies of each issue during preceding 12 months	Actual number of copies of single issue published nearest to filing date
A. Total number of copies printed	2350	2350
B. Paid circulation		
1. Sales through dealers and carriers, street vendors and counter sales	none	none
2. Mail subscriptions	2001	1982
C. Total paid circulation	2001	1982
D. Free distribution by mail, carrier or other means, samples, complimentary, and other free copies	41	40
E. Total distribution	2042	2022
F. Copies not distributed		
1. Office use, left over, unaccounted, spoiled after printing	308	328
2. Returns from news agents	none	none
G. Total	2350	2350

11. I certify that the statements made by me above are correct and complete.

Mary Curtis, *Business Manager*

Holliday, Executive Director, NARST-EDCI, The University of Calgary, Calgary, Alberta, Canada T2N 1N4. All rights reserved. Reproduction or translation of any part of this work beyond that permitted by Sections 107 or 108 of the United States Copyright Law without the permission of the copyright owner is unlawful. Second-class postage paid at New York, New York, and at additional mailing offices.

The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicate the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The per-copy fee for each article appears after the dollar sign and is to be paid through the Copyright Clearance Center, Inc. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the publisher.

Subscription price (1982): $68.00 per volume. Postage and handling outside U.S.A.: $11.00. Please allow 4 weeks for change of address. Back volumes, microfilm, and microfiche are available for previous years. Request price list from publisher.

Claims for undelivered copies must be made no later than three months following month of publication. Missing copies will be supplied when losses have been sustained in transit and where reserve stock will permit.

JOURNAL OF RESEARCH IN SCIENCE TEACHING

Contents

Volume 18, 1981

Issue 1, January

Research Papers

- Reporting Explained Variance: *Ron Good and Harold J. Fletcher* 1
- Correlations Among Cognitive Development, Intelligence Quotient, and Achievement of High School Biology Students: *Edmund A. Marek* 9
- Correlations of Junior High School Students' Age, Gender, and Intelligence with Ability in Construct Classification in Biology: *Reuven Lazarowitz* 15
- Effect of Attribute Highlighting and Diagrammatic Organization on Identification and Classification: *William Winn* 23
- Changes in Students' Attitudes Towards Science in the Transition Between Australian Elementary and Secondary Schools: *Colin Power* 33
- The Relationship Between Cognitive Style, Intelligence, and Instructional Mode to Achievement of College Science Students: *Patricia Ritchey and William S. LaShier, Jr.* 41
- Format Variations on Equilibrium in the Balance: *W. A. Juraschek and M. T. Grady* 47
- Application of Cluster Analysis to the Study of Piagetian Stages of Intellectual Development: *Frederick P. DeLuca* 51
- Conservation of Length and Instruction in Linear Measurement in Young Children: *Susan R. Smith, Cecil R. Trueblood, and Michael Szabo* 61
- Do Teachers Rate Science Attitude Objectives as Highly as Cognitive Objectives: *R. A. Schibeci* 69
- Cognitive Style and Developing Scientific Attitudes in the SCIS Classroom: *Carol Wareing* . 73
- Teaching Students to Understand the Advantages and Disadvantages of Teleological and Anthropomorphic Statements in Biology: *H. Bartov* 79
- An Assessment of the Relation Between Traditional and Paper-and Pencil Operations Tasks: *Jill K. Tschopp and Lawrence A. Kurdek* 87

Guidelines for Contributors 93

Issue 2, March

- Structural Representations of Students' Knowledge Before and After Science Instruction: *Audrey B. Champagne, Leopold E. Klopfer, Alphonse T. Desena, and David A. Squires* 97
- Ability and Science Learning: A Quantitative Synthesis: *F. David Boulanger* 113
- Evaluation of the Longeot Test of Cognitive Development: *Charles C. Ward, Susan C. Nurrenbern, Carolyn Lucas, and J. Dudley Herron* 123
- Scientific Language and the High School Pupil: Preferential Thinking Styles: *P. P. Lynch* . 131

- Actual and Perceived Teacher Clarity—Relations to Student Achievement in Science: *Michael L. Land* 139
- Effect of an Environmental Science Cirriculum on Students' Leisure Time Activities: *Abraham Blum* 145
- Group Tests of Cognitive Development Ideals and a Realization: *Michael Shayer, Philip Adey, and Hugh Wylam* 157
- Sex-Related Differences on a Task of Volume and Density: *Ann C. Howe and Michael Shayer* 169
- The Effect of Instructor-Prepared Handout Materials on Learning From Lecture Instruction: *James A. Petrich and Earl J. Montague* 177

Issue 3, May

- The Influence of the Type of Practice in Acquiring Process Skills: *W. R. Zeitler* 189
- A Model for the Effect of an Inservice Program on Junior High School Student Science Achievement: *P. S. O'Sullivan, M. K. Piper, and J. P. Carbonari* 199
- Sex-Role Stereotyping by High School Females in Science: *Edward L. Vockell and Susan Lobonc* 209
- A Survey of Environmental Issues Treated in Science Education Curricula Before and After 1974: *Abraham Blum* 221
- The Effectiveness of Science Supervisors and Their Membership Status Within a Faculty: *William C. Ritz, Jane G. Cashell, and Martin F. Felsen* 229
- How Do Intermediate and Junior High School Students Conceptualize Living and Nonliving?: *Pinchas Tamir, Rachel Gal-Choppin, and Rachel Nussinovitz* 241
- Effects of a Televised In-Service Program on Attitudes of Elementary Teachers: *Daniel S. Sheldon and Dean Halverson* 249
- Field Independence, Task Ambiguity, and Performance on a Proportional Reasoning Task: *Susan G. Nummedal and Francis P. Collea* 255
- The Effect of Retesting on End-Of-Semester Performance in High School Chemistry at Three Levels of Previous Science Achievement: *George E. Deboer* 261
- An Investigation into the Effects of a Modified Mastery Strategy on Achievement in a High School Human Physiology Unit: *Cynthia L. Lueckemeyer and Eugene L. Chiappetta* 269
- The Effectiveness of Using Previsit Instructional Materials on Learning for a Museum Field Trip Experience: *Eugene D. Gennaro* 275

Issue 4, July

- Editor's Note: *James A. Shymansky* iii
- Selective Attentional Effects of Textbook Study Questions on Student Learning in Science: *William G. Holliday* 283
- Correlation Between Performance in Physics and Prior Mathematics Knowledge: *H. T. Hudson and Ray M. Rottmann* 291
- The Effects of A Problem Solving Strategy on the Achievement of Earth Science Students: *J. Michael Russell and Eugene L. Chiappetta* 295
- The Effects of Preservice Teacher's Cognitive Questioning Level and Redirecting on Student Science Achievement: *Joseph P. Riley, II* 303
- Instruction and Science Learning: A Quantitative Synthesis: *F. David Boulanger* 311
- The Effect of Computer-Assisted Instruction on the Attitudes of College Students Toward Computers and Chemistry: *Claudia S. Cavin, E. D. Cavin, and J. J. Lagowski* 329

- How Do College Students Solve Proportion Problems?: *Melvin C. Thornton and Robert G. Fuller* 335
- Hypothesis Testing in Students: Sequences, Stages, and Instructional Strategies: *David Moshman and Pat A. Thompson* 341
- The Effect of Teacher Vagueness Terms on Student Performance in High School Biology: *Lyle R. Smith and Grace H. Bramblett* 353
- The Effects of Teacher Anxiety and Modeling on the Acquisition of a Science Teaching Skill and Concomitant Student Performance: *John J. Koran, Jr. and Mary Lou Koran* 361
- Age and Developmental Level as Antecedents of Science Learning: *F. David Boulanger and Barbara K. Kremer* 371

Comments and Criticism

- Comments on Wollman and Lawson's Research on Proportional Reasoning: *Peter F. W. Preece* 385

Issue 5, September

- Editor's Note: *James A. Shymansky* iii
- Development and Validation of the Conceptions of Scientific Theories Test: *Joseph C. Cotham and Edward Smith* 387
- Effect of Individualized Goal-Setting on College Biology Students' Locus of Control: *John E. Schafer* 397
- Evaluating the Effectiveness of an In-Service Science Program Through the Use of Materials: *David R. Stronck and Geraldine R. Koller* 403
- Pupil Engagement in Learning Tasks: A Fertile Area for Research in Science Teaching: *William Capie and Kenneth G. Tobin* 409
- The Development of the Concepts of Heat and Temperature in 10–13 Year-Olds: *Michael Shayer and Hugh Wylam* 419
- Correlates of Formal Reasoning: Content and Problem Effects: *Marcia C. Linn, Steven Pulos, and Adrienne Gans* 435
- Qualitative and Quantitative Differences in Learning Associated with Multiple-Choice Testing: *K. Fisher, S. Williams, and J. Roth* 449
- Pictorial Presentation and Review Strategies in Science Learning: *Kathryn Lutz Alesandrini and Joseph W. Rigney* 465

Comments and Criticism

- Comment on "Self-Concept and Perceptions of Role Behavior of High School Science Students and Teachers: New Assessment Instruments": *Donald Humphreys* 475
- Comments on the New Journal Policy Limiting "Comments and Criticism" to 250 Words: *John R. Staver* 477

Issue 6, November

- A Study of the Concerns of Science Teachers Regarding an Implementation of ISCS: *Robert K. James and Gene Hall* 479
- Evaluating an Individualized Science Program for Community College Students: *Bruce W. Tuckman and Mohammed A. Waheed* 489
- An Experimental Test of an Extended Discretion Approach for High School Biology Laboratory Investigations: *William H. Leonard, Gordon R. Cavana, and Lawrence F. Lowery* 497
- Science Educators' Perceptions of Problems Facing Science Education: A Report of Five Surveys: *James J. Gallagher and Robert E. Yager* 505
- The Effects of a Diagnostic-Prescriptive Teaching Strategy on Student Achievement and Attitude in Biology: *Joe C. Long, James R. Okey, and Russell H. Yeany* 515
- The Influence of Content Organization on Student's Cognitive Structure in Thermodynamics: *Marco A. Moreira and Carlos A. Santos* 525
- Volume, Conservation, and Instruction: A Classroom Based Solomon Four Group Study of Conflict: *J. A. Rowell and C. J. Dawson* 533
- The Ability of Children to Generalize Selected Science Concepts: *Kemal Bin Abdullah and Walter E. Lowell* 547
- The Long-Term Effect of Intensive Instruction on the Open Exploration Behavior of Ninth Grade Students: *Emmett L. Wright* 557
- Effects of Academic Ability, Time Allowed for Study, and Teacher Directedness on Achievement in a High School Science Course (ISIS): *Ernest Burkman, Richard L. Tate, William R. Snyder, and Joseph Beditz* 563
